veryPC

Computers Made For Schools

Student Name: VeryPC

Subject: 2023 Product Brochure

A little about us

We're VeryPC, and we manufacture computers and customise IT solutions for the education sector across the UK. Everything we do at VeryPC is customisable to suit specific customer requirements: PC configuration, software imaging, product branding, delivery, and installation. We partner with top IT vendors to deliver durable, performance-driven technology intended to help boost learning outcomes and contribute to an improved Ofsted rating.

We've been building computers and providing IT services since 2004, growing from a small IT shop to an ever-expanding team of more than 30, working from 4,000 square feet of warehouse space. Our success has been through paying attention to our customer's needs and supporting them after the deals are done. We want customers to return and forge lifetime working relationships based on trust. We've always been a family - it's just a little bigger these days.

> When you join VeryPC as a customer, partner, or teammate, you're becoming part of our family.

We pride ourselves on giving you, our customers, exactly what you want. Our sales specialists have tons of experience in putting together the perfect computers. All of our own VeryPC devices are built in-house to your requirements. We like to use the phrase nothing is standard, and we really mean it.

We build a wide range of hardware: desktop PCs for the classroom, laptops, All-in-One PCs, signage and media players, and high-performance workstations and gaming PCs for Esports. All of our VeryPC hardware is covered by our range of warranties and serviced right here on-site at our factory in Sheffield.

MEET THE TEAM

VeryPC for Education

We have seen first-hand the difference technology can make to the learning environment. We want to help our customers improve outcomes by sharing our knowledge and experience of technology in education. With our expert recommendations, new hardware, and services, we can help improve the efficiency of your school, benefitting all involved, students and staff alike.

We'll go above and beyond what you'd generally expect from a supplier to ensure you get exactly what you need and deliver the best possible value. This is why we offer significant discounts to our education customers. We reduce our prices but don't compromise on quality, so you get as much value out of your budget as possible.

WE ❤ EDUCATION

VeryPC educational discounts enable schools to maximise the impact of their IT budget. You can opt for higher-spec units or replace a greater quantity with each purchase. Whether you choose to future-proof or boost your refresh cycle, your staff will be more productive, and your students will learn more smoothly with better-quality technology.

A successful educational IT solution can increase student engagement, boost efficiency, reduce costs, and help deliver better learning outcomes. This generation's learners are our future educators, builders, healers, makers, protectors, traders, administrators, and leaders. They are the ones who will make the difference between progress and decline. Whatever we do to improve their education is worth the investment. Better outcomes ultimately lead to a better tomorrow for us all. Everyone benefits when great educators, teaching practices, and technology come together. With VeryPC, you're in safe hands and never have to worry.

Flex Micro

The teeny tiny tidy little Flex Micro

Flex Micro is a 1-litre micro tower desktop PC that can be quickly and conveniently mounted to any VESA-compatible monitor or display. Flex Micro has become a firm favourite with our education customers due to its size and performance.

Every Flex Micro comes with a lockable cable shroud to help you deal with the cable clutter that often overwhelms a PC in the mini or micro form factor. The shroud can be secured with a single screw.

The cable shroud is also removable if you prefer not to use it.

"VeryPC offers an outstanding service to our Academy, all the way from procurement through to support. We use them for many of our hardware requirements such as Flex Micro PCs and we are impressed with their own branded hardware solutions. We really couldn't recommend them enough."

David Thorpe, ICT Technical Manager, St Ivo Academy

A versatile form factor

Flex Micro makes a very tidy and convenient micro tower desktop PC. It looks smashing, but you can also remove the stand and mount it using its integrated VESA-compatible mounting plate. Flex Micro will mount to any VESA-compatible monitor or display.

Combined with Flex Micro's lockable cable shroud, mounting your PC makes for a clean and tidy desktop solution - great for crowded IT suites.

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Flex Mini

The right size, without compromise

Sometimes you need a straightforward, no-fuss, compact desktop PC that gets the job done. Step up, Flex Mini. Our plain but pleasing ultra-small form factor PC won't distract you with fancy design or extra features. What it will do is sit discreetly on your desktop, being a solid, reliable tiny PC that lets you get on with your work.

Flex Mini may be small, but it comes packed with as much computing performance as you care to specify and has room for expansion with a low-profile graphics card slot too.

If you need to quickly kit out a classroom or office without overthinking it, pick Flex Mini and move on to the next decision.

Go the extra mile with Flex Mini

Flex Mini has the optional extra of a cable shroud, helping it be more secure and tidy by securing its cables and connectors, so they aren't getting in the way.

The Flex Mini also has the optional extra mounting kit. This allows you to mount your monitors onto its small chassis, creating a tidier and more practical workspace.

Flex Mini is durable. Whether on its own, with a cable shroud or mounting kit it won't dissapoint you. Keep it simple with Flex Mini.

Flex Slim

The flexible "All-in-One" desktop

If you're planning your next IT suite refresh, look no further. The Flex Slim is a low-cost desktop PC with the convenience of an "All-in-One" style.

Every Flex Slim has a lockable cable shroud and compact stand feet for stably orienting your desktop in a slim mini-tower configuration.

The specifications of our Flex PCs are entirely configurable. Our customisation experts will help you assemble your system with the right components to deliver the required functionality.

"We got in contact with VeryPC to refresh one of our ageing IT suites, they were prompt with a quote that fit our needs and, at a very competitive price. We chose the Flex PCs and with our school branding on the side, they look great!" Dan Chan, IT Manager, Upper Shirley High School

Flexibility = adjustability

The Flex Slim is a small form factor (SFF) PC capable of mounting a VESA - compatible monitor using its optional bracket. The bracket saves desk space and is adjustable in all directions. This versatile configuration provides complete adjustability for your display:

- Tilt back and forward
- Rotate from landscape to portrait
- Swivel base on wheeled feet
- Adjust the height of the monitor up and down

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Flex AIO 24 & 27"

Why choose All-in-One?

The Flex AIO (all-in-one) PC is a punchy computer system on the Intel® platform with options for a Pentium G7400, i3, or i5 12th generation CPU. Pick a size that works for you with a crisp 23.8" or 27" full HD (1080p) display.

We have packed in up to 64GB DDR4 RAM, M.2 SSD, 3x 2.5" SATA SSD/HDDs, a full-size low-profile GPU, optional DVDRW, and up to 8x USB ports with 4x Gen 3 alongside a couple standard ports and headphone jacks you expect.

To Flex, or not to Flex?

All this performance is packed into the Flex AIO minimalistic, height-adjustable frame.

Plus, with its integrated webcam (and privacy cover), you can "zoom" into online meetings quickly and efficiently. Have your Flex AIO preconfigured with the latest Windows® 11, 11 PRO, or without OS.

The Flex AIO is a firm favourite with our customers, as it's compact enough to save space in a busy learning environment and lets you experience a natural All-in-One PC experience.

Aspect Nano

Small size, big performance

The Aspect Nano is a compact and lightweight computer that takes up minimal space. It is perfect for educational settings where desk space is limited. The small form factor makes it easy to move around and install in different locations, making it an excellent choice for classroom and lab environments. Aspect Nanos are highly customisable and can be configured to meet specific educational needs.

Powerful Performance

Aspect Nanos have powerful processors ideal for running demanding educational software and applications. They can handle multiple tasks simultaneously and have enough power to run graphic-intensive programs like 3D modelling software.

The Aspect Nano is energy efficient, which is especially important for educational institutions looking to reduce their carbon footprint and lower energy costs. They consume less power than traditional desktop computers, making them an environmentally friendly and cost-effective option.

Mounting

The Aspect Nano comes with a convenient mounting bracket that allows it to be VESA mounted. Tuck it out of sight behind a monitor, mount it under a desk, or on the wall.

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Aspect Micro

Ultra small, but mighty

The Aspect Micro is an USFF (Ultra small form factor) PC that features a full size desktop CPU and customisable specs making it compete with a full size desktop PC at a fraction of the size.

The Aspect Micro features a similar tamper-resistant front panel to it's siblings with optional security screws, providing added peace of mind that your computer is safe from a mishap.

A versatile form factor

Aspect Micro makes a very tidy and convenient micro desktop PC and looks smashing doing it, but you can also choose to remove the stand and mount it using its integrated VESA compatible mounting plate. Aspect Micro will mount to any VESA compatible monitor or display.

Specifications for any requirement

Aspect Micro can be customised to your individual requirements on the Intel® or AMD® platform with options for a Pentium, i3, or i5 12th generation and Ryzen™ 5 Pro.

- Up to 64GB DDR4 RAM
- M.2 SSD
- Up to 8x USB ports including gen 3.2

Aspect Mini

The right size, without compromise

The Aspect Mini is a powerful and compact PC designed specifically for use in the education and business sectors. Its sleek, modern design features zero bezels, giving it a clean and professional look and making it easy to brand with your company or school logo.

In addition, the tamper-resistant front panel can be secured with additional security screws, providing added peace of mind that your computer is safe from a mishap.

More secure for a demanding work environment

The tamper-resistant front panel can be secured with additional security screws, providing added peace of mind that your computer is safe from a mishap. Classroom or office, warehouse or front of house. No matter where the Aspect Mini lives, the new robust design will keep your new investment looking great.

Wear your colours with pride

Thanks to the no-bezel design, the new Aspect Mini has a more brandable surface to make your mark. We listened to feedback and removed the often unnecessary disk tray to make way for better looks and branding.

Ask about our in-house design team, who can work magic to bring your business or school brand to centre stage.

- Full colour printing
- Durable long lasting sticker

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Aspect Tower

The right size, without compromise

Our new and improved Aspect Tower packs a punch and looks good doing it. Featuring a no-bezel design for a cleaner look and better branding options. The Aspect Tower is fully customisable to your specification requirements and to reinforce your business or school brand for that little extra wow factor.

Explore our classic tower computer, which is fully brandable, customisable, and secure with a tamper-resistant front shield thanks to some additional security screws.

The right size, without compromise

Introducing the latest iteration of the Aspect Tower, boasting a sleek and distinct surface that can be customised to showcase your unique brand. Our team carefully crafted this design based on customer feedback, removing the disk tray to create a streamlined, sophisticated look that perfectly complements your branding efforts.

To take your branding to the next level, we offer the services of our talented in-house design team, who can work their magic and elevate your business or school brand to centre stage. Don't miss this opportunity to make a lasting impression with the classic Aspect Tower.

Aspect AIO 24"

Effortless elegance

VeryPC Aspect AIO floats effortlessly over your desk on its solid metal base. The style is matched by fantastic performance: customisable up to Intel® Core™ i5, 32GB RAM and SSD. Experience the ability to multitask efficiently with the Aspect AIO.

With a full HD IPS 23.8 inch display, resolution of 1920x1080 and anti-glare, you can enjoy every visual moment with this proper all-in-one solution. This new visual experience means the screen can easily be rotated 90° degrees, but we don't stop there. The Aspect AIO is also height adjustable and rotatable by 45° left or right.

Adjustability

The Aspect AIO can be flexible to anyone's requirements. Prefer to work with your screen portrait? Aspect AIO can be rotated 90 degrees for your portrait view but can be put back to landscape orientation within seconds. The stand can be swivelled 45° left or right, showing a realistic and delicate picture regardless of its rotated angle. The Aspect AIO can also be height adjustable, so no more neck pain or piling books to easily see your screen. With a simple lift of the screen, you'll have the perfect viewing experience.

Feel at ease while working with its configurations that provide complete adjustability for your display; Tilt the display forward and back, rotate from landscape to portrait, swivel the stand left and right and adjust the height.

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Aspect AIO 24" touch

The ultimate all-in-one touchscreen

The Aspect AIO Touch takes the convenient All-in-one package but adds 10-point capacitive touch functionality, a versatile "Z style" arm that allows you to swivel, twist, tilt, and lower the screen into an almost tablet-like configuration.
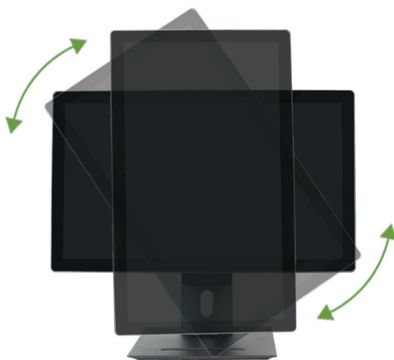

The robust design and ability to have the touch screen in landscape, portrait, or "tablet mode" makes the Aspect AIO Touch perfect for the classroom, reception, or even a point of sale.

Packed full of features

The Aspect AIO touch features a narrow bezel, full HD IPS touch screen, pop-up webcam, stereo speakers, and the ability to be VESA mounted to alternative gas arms or even the wall.

Aspect AIO Touch is a unique and powerful all-in-one system featuring a choice of Intel® i3 or i5 12th generation CPU, built-in WiFi and Bluetooth, up to 32GB DDR4 RAM, and M.2 SSD storage to suit your needs.

Thinbook

Sleek, stylish performance

The VeryPC Thinbook is the easiest laptop buying decision you could ever make. With its Full HD display, the Thinbook's screen displays crisp graphics and is fantastic for productivity.

With its 180-degree screen hinge and lightweight design, the VeryPC Thinbook can be tilted and adjusted to suit any position and the VA screen panel supports collaboration and sharing of information as the screen can fold flat and be viewed from a wide angle.

"In terms of pricing and flexibility of a custom-built laptop, VeryPC wins my vote! With the price of their hardware and the amazing service provided by the VeryPC team, I'm looking forward to a long term relationship. I can't praise them enough. Price = amazing, service = amazing. What else do you want!" Andy Field, IT Manager, The Bishop's Stortford High School

Lightweight but Powerful

The Thinbook may be small and nifty but with a long-lasting 49Wh battery and USB Type C 3.0 port, there's no compromise on power or connectivity.

The battery is easily replaceable should you need to change it in future and the laptop charger is small and compact for easy storage and portability. With a 49Wh battery, you should be getting 3–5 hours of battery life.

The USB Type C 3.0 port is a great addition to the Thinbook. USB-C 3.0 is rapidly becoming the new 'go-to' connection of choice.

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

ARENA Range

Introducing ARENA Player One, Player Two, iCUE

Say hello to our new range of Esports and gaming computers. Arena will take your gaming experience to the next level! Customisable to suit any gaming suite on both Intel and AMD.

Our high quality, premium cases are packed with the latest GPUs and the best graphics cards from leading brands to ensure that you're geared up for the in-game performance you need.

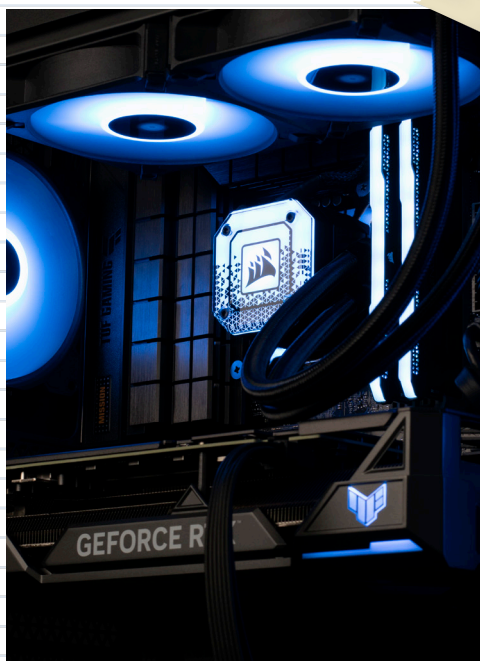

Esports in Education

Considered the world's fastest-growing sport, esports is an exciting team activity that links to computing education, STEAM (Arts) subjects, and the development of digital skills.

We're supporting educational institutions with hardware specifically designed for esports. In no time at all, you'll be setting up your school's first competitive team and developing new career paths for your students.

Our in-house techies have worked extensively to provide a wide range of solutions that mean we know the best hardware blend to deliver esports performance excellence and we ensure we back our high-quality build with exceptional customer support.

Branded Devices

Devices from top brands

It might surprise you, but it's not just our own range of hardware that we supply to education. We work with a wide range of vendors to supply their laptops, mobile devices and desktop PCs to you.

Our ability to provide you with devices from brands such as Acer, ASUS, Dell, HP and Lenovo has seen our buying power increase, which in turn gives our sales team access to fantastic pricing.

It goes without saying, but you will still experience the same care and attention from us, no matter the brand of device you're buying.

Enhanced with VeryPC magic

Upgrade your device purchase with a selection of VeryPC customisations. You can, of course, opt to receive your products directly, untouched in their sealed boxes, but various special VeryPC services are also available to enhance your experience. These include custom branding, software image deployment, asset tagging and inventory management. An added benefit of your devices being customised at our factory is that we'll spot flaws and can have any faulty products replaced straight away.

"Having previously furnished us with a batch of Lenovo laptops, we again went with a Lenovo branded device. VeryPC were able to supply these more competitively than anyone else I approached, including some big name resellers, but were still able to offer us all of their usual extras, such as custom branding." Andy Pacey, IT Manager, Boston High School

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Chromebooks

Discover the power of Chromebooks with VeryPC

Chromebooks are taking the education market by storm and we've seen a huge increase in demand over recent years as schools discover the power of Google. This may come as a surprise to some of you, and we'd forgive you for thinking that we only sell our own VeryPC built devices, but if Chromebooks are your thing, then you're in the right place.

Whether it's taking the leap to become a "Google School" or you're just delving into the world of Chromebooks, then we're on hand to help. And as with most things here at VeryPC, we can add our own bit of magic on top, too. And as a Google for Education partner, you're in safe hands with us.

Benefits of Chrome

With more schools turning to ChromeOS, we've found that the simplicity of the operating system and overall ease of use is perfect for the education sector. There's no waiting for devices to boot up either as Chromebooks are ready to use within 8 seconds of being turned on.

From a technical aspect, ChromeOS is a light operating system where most of the "heavy lifting" is done through central computers in the cloud.

We've really cemented ourselves as a key Chromebook provider, and alongside our access to stock and competitive pricing, it's worth speaking to us and discovering all things Chrome.

Signage Players

Convert your big display into a digital signage screen

Provide a new way of displaying high-definition media and digital content with our signage and media player range. Despite their small design, it offers all the performance you need to instantly turn your display into a giant all-in-one digital signage solution. Choose from a wide range of configurations so you can build the media player you need

Our hardware platforms include OPS and media players, TV panels with WEBOS and our Mini PC range, which works with Windows and Android operating systems. In no time, you'll be quickly displaying digital content.

OPS System

Open Pluggable Specification (OPS) is the industry standard for connecting computer devices to flat panel/interactive displays via a universal internal slot. The VeryPC OPS System is powered by your choice of Intel® Core™ i3, i5 and i7 CPUs.

With no cables, the VeryPC OPS System plugs into a single slot in the back of any OPS-compatible display (both touch and non-touch), instantly converting your big screen into a giant All-in-One Windows® PC. Plus, with 4K compatibility, your content will never look better.

Our media player lineup

K-series

Get your digital content on any compatible big screen available in touch & non-touch.

D-Series

With Android software compatible with lots of software solutions to bring your media to life.

Z-series

Compact micro media player packed full of features for a wide-variety of uses.

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Audio Visual

Big display, big experience

Flat-panel displays are now the de facto standard screen at the front of most classrooms, outperforming older interactive display technologies with a far superior user experience. Teachers and students can benefit from the latest technology, and high-spec hardware features unavailable with projectors and boards.

An interactive flat-panel display gives you access to big, bright displays with rich, vibrant colours in 4K Ultra HD. Touch technology is built into the unit with up to 40 simultaneous touchpoints.

"VeryPC supplied and fitted an audio-visual solution for the school. The quality of installation, service and support provided was exceptional."
Artur Pawlowski, ICT Technician, King Edward Primary School

Professional installation service

We offer a full on-site installation service with a team of trained professionals, so you don't have to worry about doing any of the heavy lifting, mounting or cabling. We'll do the hard work and make sure everything is working perfectly. All you'll need to do is sit back and enjoy your new piece of kit.

It's also worth knowing that we can offer you evening and weekend installations to work around your busy schedules! Whether you're upgrading, replacing or buying for the first time, our team of AV specialists are on hand to help and we'll ensure everything is in place.

Our Hardware Services

An array of extra services

Over the years, we've become known for the phrase "nothing is standard", which doesn't just apply to the inside of our machines. We want you to have the best experience possible, so we go above and beyond to ensure that's precisely what happens. The way we see it, it's our job to make your job much easier.

From the second you get in touch with us, no matter the product or service required, we'll be with you every step of the way. That's why we offer a whole host of additional services that will enhance the look and feel of your new IT equipment.

Branding

We've become famous for adding a splash of colour to your new PCs with our custom branding options, which have become popular with staff and students. From the initial design, printing, and laminating to application on your new PCs, it's all done in-house at VeryPC with our design specialists.

With your school's branding on, it makes your PCs more yours. We've found that students treat their devices more respectfully and are proud to use them. You needn't worry about pesky students peeling them off either, as the material gradient is strong and resistant to rips and tears. If a super-strong student comes along, don't worry - we'll ensure we send out some replacements for you. Not only do we take care of the inside of your PC, but we also look after the outside.

"Getting the branding was a real added bonus and has been so easy to sort out. I simply emailed across our branding guidelines, sat back and waited and within a few hours a mock-up was sent over that blew me away. I sent this to our Marketing Director who approved the idea straight away and said that the VeryPC team had interpreted our needs perfectly."

Tony Cartwright, Systems Manager, Evolve Trust

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Asset tagging

We can asset tag your hardware using a series of sequential numbers you supply. We can use the tags you provide to us or get the tags made for you - the choice is yours.

This doesn't just apply to VeryPC hardware, either. Even if you buy devices from leading brands through us, we'll also apply asset tags to those.

Deliver to desk

We want you to have a smooth and effortless journey with us. So from telling us your requirements, we don't stop until pupils are sat using their shiny new toys. If you need an extra pair of hands on the day when it comes to setting up your new PCs, then, honestly, don't be afraid to ask. You're the boss.

We'll get a team member on-site to help with unboxing, lugging things around, or even a complete desk installation, which includes connecting everything together, cable management, and giving your machines a quick boot-up to ensure everything is in order. We'll even take the packaging back with us.

Warranty

We're proud of our work here at VeryPC. Much care and attention go into every product that leaves our factory, from meticulous construction to being boxed and ready to ship. Annoyingly though, electronic components are not infallible. When a rare fault we're responsible for happens, your inclusive VeryPC warranty ensures that your computer is either fixed or replaced at no extra cost. Our warranties range from a standard 1-year collect and return through to 5-year warranty options, and our team is on hand to get the best guarantee that works for your school. But if something's gone wrong, we'll do the hard work. That's a promise.

Shape the Future

Get affordable devices with Microsoft's Shape the Future scheme

We're constantly surprised at how many schools aren't aware of the Shape the Future scheme, which allows schools to purchase devices with discounted Windows licences from Microsoft partners - that's us!

Any UK school with a valid UK school email address is eligible and these devices can be used by administrators, teachers and of course students. A key aspect of our Named Partner relationship with Microsoft is offering access to affordable devices to any qualifying primary or secondary school and that's something we're very proud of. If your school isn't taking advantage of the scheme, be sure to get in touch with us.

How does the process work?

It's a relatively simple process to get started with the Shape the Future scheme and should you encounter any issues, our team is on hand to run through the process with you.

All you need to do is verify your school email address and register for the programme by using the electronic form on the Microsoft website. By registering your school's eligibility, you'll then qualify to purchase discounted Windows licences from VeryPC.

We're even able to send you an email template to send directly to Microsoft, should you encounter any issues. We won't leave you stranded!

0114 321 8609   www.very-pc.co.uk   info@very-pc.co.uk

Google for Education

We're delighted that VeryPC is a Google for Education Partner.

In short, this means that as an authorised reseller, we can provide you with education licensing for both Chrome Device Management and Google Workspace for Education Plus, all at special educational prices.

Chrome Device Management Licences

One of the joys of Chromebooks is being able to manage all your Chrome devices through one single console and that's where you'll need a Chrome Device Management Licence. A license is required for each individual device you own, however it lasts the entirety of said devices lifetime. An administrator is then able to configure settings, enforce policies, control user access, configure network access and much more.

G Suite Enterprise for Education

If you want to go one step further, then Google Workspace for Education Plus is effectively the "pimped up" version of Google Workspace for Education Fundamentals, with education very much still in mind and built into its core.

Google Workspace for Education Plus is a suite of tools that enhances the lives of your admins and takes collaboration to the next level with key features including: digital classrooms, 250 participants in a Google Meet, live streaming and attendance tracking.

veryPC

Technology is our business
