

Dedicated long-time customer embraces new role by harnessing the power of VeryPC's All-in-One Touch Devices

Steven Brackley has been a long-service customer of VeryPC for more than five years. Previously working in the education sector he discovered VeryPC from an online search. After speaking with some of his contacts within the industry and the glowing reference they gave Steve took the opportunity to meet some of the VeryPC staff at the Bett Show. Steve could instantly see the passion and expertise of the staff.

Problem

Steve contacted VeryPC after transitioning from the public to the private sector. His new position as Executive at Pantheon A Family Office required 10 All-in-One machines with a touch screen option. The specifications required an Intel processor, with a minimum of an i5, along with 8GB or 16GB of RAM and at least a 512GB SSD. While Wi-Fi was not necessary, Windows 11 needed to be included.

Results

Steve and the team at Pantheon A Family Office have been using the Aspect All-in-One Touch devices for almost three months now and all staff are happy with their new devices with such positive comments about how amazing they are. Collaboration is enhanced by the device's 10-point capacitive touch, enabling optimal outcomes.

Solution

The Aspect All-in-One Touch was the perfect device for the team at Pantheon A Family Office. Featuring a versatile "Z style" arm that allows you to easily swivel, twist, tilt, and lower the screen into an almost tablet-like configuration.

The robust design and ability to have the touch screen in landscape, portrait, or "tablet mode" makes the Aspect AIO Touch perfect for any scenario. The pop-up webcam is great for added privacy when not in use.

"Working in IT is always challenging: the finance department wants cost-effective IT solutions; the IT department wants the best and latest technology. Sometimes this can be frustrating, and the IT department tends to lose. Fortunately, with VeryPC, I was able to get custom-built devices to the exact specifications I needed without needing to pay for extras I didn't require."
