Kart Sim Ltd utilise the performance and versatility of ARENA to power their client solutions

KartSim Ltd, located in Silverstone Park, Towcester, offers top-tier karting simulators for professional and home use. Their range includes the KartSim Pro Simulator, replicating real kart dynamics, and the Esports Simulator.

Their esports team collaborates with major karting series organisers globally, providing software solutions that closely mimic real-life championships. They design karts with high-detail physics and aesthetics and create exact track replicas using laser-scanning. This, combined with live race control and broadcasting with commentary, ensures unmatched realism in competitive esports karting.

These simulators, with features like advanced force feedback, are ideal for driver training. KartSim also provides custom software and hardware packages, along with global shipping and technical support, making them a favourite among dedicated karting enthusiasts.

Requirement

Tony at KartSim needed a reliable partner to supply high-performing and reliable systems to work in tandem with his Simulators and his Karting Software.

Together we have helped KartSim expand their range to 3 different tiers of Systems. Pro, Esports, and Ultimate.

Solution

ARENA Player One
Entry level esports/gaming PC

- AMD Ryzen 7 PRO 5700G Processor (8 Core, 3.8Ghz)
- 32GB 3200MHz Performance DDR4 Kit (2*16GB)
- 1TB M.2 NVMe SSD
- Nvidia GeForce RTX 4060 Ti 8GB Graphics Card
- 3 Year Collect and Return Warranty

"VeryPC has been a fantastic partner for KartSim. Thanks to them, we've curated PC options that bundle with our simulators, giving customers a ready-to-race package straight out of the box. Our three options— Ultimate, Pro, and Esports—allow customers to choose the computing power that suits their needs. We look forward to continuing our partnership with VeryPC."
