

Pixite: Leading UK LED display provider, powered by VeryPC's innovative signage solutions

PIXITE.

PIXITE has provided LED displays to some of the largest brands & events in the UK, from nightclubs and bars to corporate suites and head offices. Based in the UK's Northern Powerhouse of Manchester, their design studio has helped to establish the LED display market in the UK with continually evolving designs.

With a strong emphasis on maximising the full audiovisual experience for stage, festival and immersive events, PIXITE has become the go-to brand for companies that really want to make an impact on their customers.

With 20 years of experience in the technology industry, their products now include everything from indoor and outdoor displays, digital signage and video conferencing, to floor and ceiling displays, LED posters and bespoke creative visuals.

Requirement

The Pixite team were in need of a solid and reliable digital signage player, powerful enough to support a range of display products for use in retail, event and corporate environments.

One of the most important factors was choosing a product that is powerful enough to handle 24/7 operation. They wanted a compact but high quality solution that is adaptable and capable of supporting a range of display products and options in their portfolio.

At VeryPC, we had the perfect solution, the D039 Android Signage Player.

Solution

The extremely reliable D039 delivers eye-catching, dynamic content, effectively engaging your audience, and you can showcase essential data like timetables, news, special offers, and point-of-sale information, as well as creative and immersive customer interactions.

Key Features:

- 24/7 operation and silent operation
- Strong Wi-Fi Signal pickup
- Excellent performance even when left on 24/7, without lag or slowdowns
- Ability to run NowSignage and TeamViewer simultaneously for remote management and experiences.

“Working with VeryPC has been a game-changer for our digital signage solutions. Their digital signage players have proven to be incredibly reliable and powerful, seamlessly powering our LED video walls and displays. The performance and quality are unmatched, allowing us to deliver stunning visual experiences to our clients.”

Ben Ramsden
Operations Director
