

K115 Signage Player

Product Overview

Introducing K115

K115 Quad Display Signage Player (x86)

The K115 is an ultra slim, powerful quad display signage and media player built for reliable 24/7 use. It is robust, fanless, and supports Windows 11 IoT Enterprise, or Windows 11 Pro. Powered by an Intel Core i5 1335U CPU with Intel Iris Xe graphics, it can drive up to four 4K displays at 60 Hz.

Core Specifications

- Processor: Intel Core i5 1335U
- Graphics: Intel Iris Xe
- Memory: 2 x SODIMM
- Storage: M.2 SSD

Rated for 24/7
Use

Typical Applications

Ideal for single-screen digital signage, retail displays, wayfinding systems, kiosks, and totems that require silent, efficient, and continuous operation.

Features

Windows 10/11 IoT

The K115 supports Windows 11 IoT Enterprise, or Windows 11 Pro, giving you flexibility to match the operating system to your chosen CMS or custom application.

Fanless Design

With passive cooling, the K115 offers quiet operation suited to confined spaces.

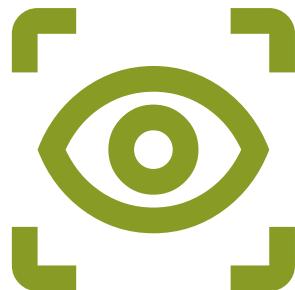

RTC Power Scheduling

Real time clock power scheduling lets you power the system on and off at set times and dates. Save power and extend the life of your device.

Quad 4K 60 Hz Outputs

The K115 supports up to four 4K 60 Hz displays over HDMI. Run multi-screen menus, feature walls, dashboards, or separate content channels from a single ultra slim player.

Watchdog

Watchdog keeps an eye on your device. If it encounters an error or crashes, it can automatically reboot the system.

OEM Services

Our OEM service is designed to get your devices out of our factory pre-configured, fully branded and ready to go. You cut down on setup, speed up deployment and get a solution that works straight out of the box, saving you both time and money.

Short Lead Time

We typically hold up to three months of stock of key product lines in the UK to keep lead times short.

Custom Firmware

We can preconfigure firmware to your required settings, including BIOS splash screens and core security options.

System Imaging

We can preload your own system image, or design, build and test an image on your behalf and apply it at the factory.

Low MoQ

We do not have a minimum order quantity. Our hardware and services are available from one unit upwards. Pricing is simple: a one-off setup fee and a per device cost for each service.

Call Off Orders

Plan once, deploy as needed. Place a single bulk order and we build to your agreed spec, then you call off units in batches as projects go live.

Bonded Stock

Avoid supply surprises on critical projects. We hold an agreed quantity of finished units or key components in our warehouse, reserved just for you.

Credit Lines

With an agreed credit line, you can order against upcoming rollouts, align payments with your own customer billing and cut down admin for repeat work.

White Labelling

We design and produce packaging that carries your logo, colours, product information and messaging, along with any labels and identifiers you need.

Ports

Ports

1. Power Button
2. USB 3.1 (Type-C)
3. USB 3.0 (Type-A)
4. 3.5mm audio

9. DB-9 RS232

5. HDMI 1.4
6. USB 3.0 (Type-A)
7. LAN (RJ45)
8. D/C in

Supported Resolutions

Supported Resolutions

Video Format			Output
